(f) Pre-sorting of Garment Material for Recycling

(1) Upon the commencement date of the Pilot Garment Recycling Project, all garment manufacturers in the CNMI shall deliver all garment waste to the recycling facility located at the rear of the Department of Public Works (DPW), Technical Services Division (TSD) building in Lower Base, Saipan, MP. In order to facilitate the operation of this project and prior to delivery of any garment waste to the recycling facility, all garment manufacturers are required to separate their garment waste into four categories. The categories are:

- (i) White fabric - 100% cotton
- (ii) Colored fabric - 100% cotton
- (iii) 60% or more cotton
- (iv) All others.

(2) All other types of municipal solid waste (MSW) (normal garbage) must be removed from the garment waste prior to delivery. Plastics, cardboard, and household waste will not be accepted. Any loads found to be sorted improperly or contaminated with other types of MSW will be rejected and will not be accepted at either the DPW/recycling site or at any solid waste facility including Puerto Rico Dump and the Marpi Landfill. These loads will require re-sorting to be acceptable. Any load that is rejected by the operator of the recycling facility due to contamination from kitchen and other type of wet trash or otherwise contaminated with plastic, cardboard, and other garbage that cannot be pre-sorted must return to the scale house at the transfer station to be assessed an additional thirty-five dollars per ton prior to disposal at any waste management site including but not limited to the Puerto Rico Dump and the Marpi Landfill.

(3) Tipping fees will be collected at the DPW/recycling site. Fee assessment will continue to be based on volume until such time as the Lower Base Refuse Transfer Station (LBRTS) is operational. At that time, haulers will be required to report to the scale house at the LBRTS to have the loads weighed prior to delivery to the DPW/recycling site.
